

Avaya Telephone System Solutions

Telefonix Voice & Data install and maintain Avaya telephone system solutions for every size and type of business. Avaya telephone systems are our most popular telephone systems and are specifically designed for small and medium businesses. The features which distinguish Avaya systems from the others include:

- Established supplier with excellent roadmaps, investment protection guarantees and ROI
- Wide range of standard features encompassing everything a business needs from its communication platform to make it in the 21st century
- Easy to use handsets & software which are both continually updated
- Great range of additions made by 3rd party suppliers - music on hold, call logging etc

Gold SMB
BusinessPartner

Why Telefonix Voice & Data?

Telefonix Voice and Data are a Gold SMB Avaya business partner which specialises in Avaya IP Office telephone systems for companies in the sub 300 space

- Telefonix Voice and Data are one of the test centres for new versions of Avaya IP Office and we are able to feedback on what features go into new versions
- A converged IT and telecoms company through which you'll obtain great value for money by combining your requirements into one, we also have the largest converged demonstration centre in the south of England
- Ongoing record of success with Avaya telephone systems as witnessed by these Avaya case studies:
 - "We were at our wits end with our phone and contact centre supplier experience and were concerned about the levels of customer service being offered to our customers. Luckily we found Telefonix, a converged voice and data solutions provider who matched us in hard work, creativity and knowledge."
 - "We've been delighted with the technology recommendations that Telefonix have made to us. In particular, investment in Telefonix' recommendation of the Avaya IP Office system continues to bear dividends, serving our factories, offices and mobile sales team to an equally high standard."
 - "Our aggressive business plans require shrewd investment in a technology solution that will support the evolution of the business, and Telefonix demonstrated a rare understanding of not only the technology, but how to apply it to support a rapidly growing multi-site operation."
 - "Investing in Avaya IP Office when our company was in need has proven to be a very smart business decision, coupled with the backup and support of Telefonix who are as creative in telephony as we are in ballooning."
 - "By redesigning our account handling departments into four separate call groups, we immediately noticed a difference in the customer service that we were able to give to our clients. Since then we have gone from strength to strength, expanding our customer teams as much as 70% in one year, and with Telefonix maintaining the system for us, the system is completely hassle free."
- Our staff are all Avaya-certified
- Incredibly competitive deals on offer because of our volume of sales
- Discounts on support, maintenance and subsequent item purchases

IP Office Advanced Edition

Superior Customer Service and Intelligence

Overview

IP Office *Advanced Edition* enables growing businesses to take advantage of Avaya's industry-leading contact center expertise. For small to medium businesses that want to differentiate themselves through exceptional customer service, *Advanced Edition* provides customer service reps and their supervisors with the tools to effectively handle call volumes and gather and report valuable customer intelligence to help increase sales and agent productivity.

Building on the IP Office *Preferred Edition* (required prerequisite), *Advanced Edition* helps businesses take customer service to a higher level.

Capabilities

- **View agent status** – Customer service reps and supervisors can get real-time information on call queues, hold times, agent status and more, to help ensure customers are always being served quickly, efficiently and professionally.
- **Assess agent productivity** – Customer service supervisors can gather current and historic data and generate reports to gauge the productivity and performance of agents. The intuitive browser-based interface offers drag-and-drop simplicity, making it easy to configure, generate and deliver customized reports that can be acted upon quickly.
- **Manage campaign performance** – Growing businesses can get real-time insights into how marketing campaigns are performing so resources can be adjusted if necessary to maximize on the investment. Capture information such as telephone number and area where responders are calling from (among other data) that can help streamline costs and boost campaign-generated revenue.
- **Selectively retrieve recorded calls** – Call recording can positively impact customer service and revenue and it also enables more meaningful training sessions. Calls can be easily and securely retrieved from any PC by searching on any number of fields such as date, time and extension number, and archived to a storage device such as DVD.
- **Automate popular inquiries** – Free up valuable time for customer service reps by providing customers with easy-to-use caller menus for fast and efficient responses to commonly-asked questions. Callers can respond with touch-tone or voice response (or both). Create customized surveys. Retrieve information the same way voicemail messages are replayed.
- **Create self service menus** – Improve responsiveness to customers and continue generating revenue even outside of normal business hours. Customized, automated self-help menus allow customers to place or change orders, check status of shipments, and more.

Benefits

- **Measure and track customer service** – Real time and historical call statistics gives your business insight into how well you are serving your customers
- **Quicker response to service issues** – Simple to use management tools enable you to react to and change routing rules, agent assignments or service capacity on demand
- **Manage resources efficiently with automated 24/7 service** – Self-help options can drive revenue in off-hours (access information, get directions, check order status and more) and free up agents for more critical, customer-facing tasks
- **Discover new opportunities** – Leverage your customer recordings for first-hand information on what your customers want. Confidently create new offers or enhance existing ones to boost your revenue stream and expand market presence
- **Address individual agent needs** – Quality checks (through call recordings) can reveal both positive and negative agent performance. This will enable you to correct or reward accordingly
- **Conflict resolution** – Replay customer conversations to help resolve customer issues with the facts

Specifications
